SECOND PRELIMINARY AMENDMENT

RECEIVED

JUL 17 1994

GROUP 2500

Honorable Commissioner of Patents  
and Trademarks  
Washington, D. C. 20231

Sir:

Preliminary to the first Office Action and subsequent to the first Preliminary Amendment dated March 10, 1994, please amend the above-identified patent application as follows:

In the Claims:

Please amend claims 1, 5-7, 10, 20 and 28 by adding the underlined sections and deleting the sections in brackets ([]):

1. (Twice Amended) A latching apparatus comprising:
- a post member defining,
    - an elongated axis,
    - an elongated, axially extending latching surface defined by at least one outer radius from said elongated axis, and
    - an elongated, axially extending releasing surface defined by at least one inner radius from said elongated axis, wherein said outer radius is greater than said inner radius;
  - a latching assembly defining a passage for receiving said post member and including a grip means extending at least partially into said passage for, effecting a grip between said post member and said latching assembly when said grip means [engages] cooperates with said latching surface, and
